

# ROLLER BLIND

## SPECIFICATION

## ON MEASURING

Please note due to the fact the blinds are made to measure, we ensure the roller tube will measure the finished blind size, not the fabric width.

This means the fabric will be between 3cm-4cm narrower than the overall width of the headrail.

## IMAGES & SAMPLES

The images on this product, as well as the physical samples that arrives to you, are showing the design printed on the blackout base. This is to show the design in the clearest way, providing accurate colour.

Please note that different fabric bases may display slight variations in colour due to different absorption rates and reflectivity.

## ROLLER BLINDS

**Sidewinder:** 4.5mm White chain, upgradable to rust-resistant chrome.

- Roller blinds come with a sidewinder cover, please do not attempt to remove this cover.

**Tube Composition:** Aluminium

**Tube/System Size:**

- 32mm: Up to 1800 width x 2000mm drop
- 38mm: Up to 2500 width x 2500mm drop
- 45mm: Up to 3000 width x 4000mm drop

**Finish:** Double-wrapped bottom bar

**Bottom Bar Composition:** Aluminium or PVC

**Bottom Bar Size:** 30mm x 15mm

**Manufacturing Tolerance:** All items are cut to size and will be accurate with working tolerances and variances of +/- 5mm.

**Base Options:**

- Standard: Polyester, light-filtering fabric
- Optional: Polyester, blackout fabric

If you select blackout, the back of the fabric will be white.

**Brackets:** 45mm width x 65mm length
