

## Roman Blinds Fitting Instructions:

Cord Lock Operation – Page 1 and 2

Sidewinder Operation – Page 3 and 4

## Roman Blind Fitting Instructions (Cord Lock Operation):

### Step 1

#### POSITIONING

The brackets should be positioned at each end of the headrail approximately 110mm in and intermediately spread across the width as required.

#### TOP FIXING (A)

Measure and mark the distance (D), allowing for obstructions like handles that protrude into the recess area. Hold each bracket into place and mark the hole positions. Fit each bracket using the screws provided.

Please ensure fixings are suitable for the wall/surface to which you are mounting the brackets.

#### FACE FIXING (B)

Hold each bracket into place and mark the hole positions. Fit each bracket using the screws provided.

Please ensure fixings are suitable for the wall/surface to which you are mounting the brackets.

### Step 2

#### FITTING THE BLIND

Offer the blind up to the brackets and clip/fix in place. Clip the rail onto the brackets by resting the rail onto position 'A' and pressing back towards position 'B'.

## WARNING

Young children can be strangled by loops in pull cords, chains, tapes and inner cords that operate the product. Always use a safety device to keep cords or chains out of reach of children.

To avoid strangulation and entanglement, keep cords out of the reach of young children. Cords may become wrapped around a child's neck. Move beds, cots and furniture away from window covering cords.

Do not tie cords together. Make sure cords do not twist and create a loop.

### SAFETY DEVICE

The safety device must be installed at the maximum distance possible from the control mechanism to prevent looped chain becoming slack.

Place the safety device on the wall and mark the positioning of the 2 screw holes.

Drill holes using a suitable drill bit.

Place device into position ensuring the chain is fully taut.

### RETAINING DEVICE

Screw the retaining device using suitable fixings ensuring the device is fully closed.

(If your blind is supplied with our child safe draw rod control option, there is no requirement to fit an additional child safety device)

## Roman Blind Fitting Instructions (Sidewinder Operation):

### Step 1

#### POSITIONING

The brackets should be positioned at each end of the head rail approximately 110mm in and intermediately spread across the width as required.

#### TOP FIXING (A)

Measure and mark the distance (D), allowing for obstructions like handles that protrude into the recess area. Hold each bracket into place and mark the hole positions. Fit each bracket using the screws provided.

Please ensure fixings are suitable for the wall/surface to which you are mounting the brackets.

#### FACE FIXING (B)

Hold each bracket into place and mark the hole positions. Fit each bracket using the screws provided.

Please ensure fixings are suitable for the wall/surface to which you are mounting the brackets.

### Step 2

#### FITTING THE BLIND

Push the swing arm anti-clockwise as far as it will go. Now clip the blind over the bracket. Now clip the head rail over (top of the blind) over the bracket, firstly ease the front lip of the head rail (A) in to place.

## WARNING
