

SPECIFICATION

Our faux wooden blinds combine timeless style with modern practicality, offering the look and feel of real wood with the durability and easy maintenance of advanced materials.

Designed to withstand everyday life, they are moisture-resistant, warp-resistant, and perfect for any room – from kitchens and bathrooms to living spaces and bedrooms.

TWIST&FIT

If you’ve chosen Twist&Fit, you will be installing these blinds without the need for a drill or screwdriver.

The Twist&Fit headbox and fittings may appear slightly wider than the window recess at first. This is by design – the mechanism can be gently compressed into place and then tensioned to create a snug, secure fit.

UNTAPED VS. TAPED

Untaped/Braided: For a classic, clean look, untaped faux wooden blinds feature slim ladder cords that blend seamlessly with the slats. This design maximises light control and visibility when tilted open, while maintaining a sleek, understated appearance.

Taped/Deluxe: Taped faux wooden blinds introduce a decorative and practical upgrade. Wide cotton tapes run vertically along the slats, available in complementary or contrasting colours to suit your interior style. These tapes not only add a bold design accent but also conceal the ladder cords, giving a streamlined, tailored finish.
