

247 Blinds – Ecowood Supreme & Emperor White – Specification

Decorative cotton ladder tapes are available in 25mm width on our Deluxe range.

These Faux wooden blinds are provided with up to 6 ladders at the largest available size for ample support & durability.

Decorative colour co-ordinated wooden control toggles. The raise control will have 1 toggle, whilst the tilt will have 2 smaller toggles.

All items are cut to size and will be accurate with working tolerances and variances of +/-5mm.

Braided Faux Wooden Blind

Taped Faux Wooden Blind

On Supreme - A D-shaped pelmet will cover your headrail. This is colour-coordinated to your chosen slat colour.

On Emperor - A bevel-shaped pelmet will cover your headrail. This is colour-coordinated to your chosen slat colour.

The pelmet is made to suit the type of fitting.

For a recess fitting, the pelmet is made to the width ordered so it sits inside the recess.

For an 'exact' fitting, the pelmet is made up to 2cm wider than your headrail overall and will not come with mitred side pieces.

All our blinds are manufactured and supplied to be compliant with child safety regulations. As part of this compliance, all control cords and chains will be made to a maximum of 1 metre. If you need to discuss this, please contact us.

Components

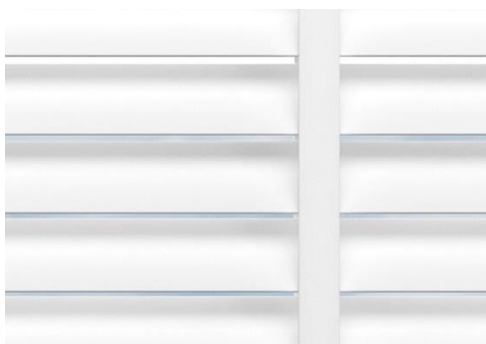

50mm Headrail is colour-coordinated and 59mm depth x 42mm height.

50mm Box brackets are colour-coordinated and 65mm depth x 47mm height.

50mm PVC Trapezoid bottom bar is colour-coordinated and measures 50mm depth x 13mm height.

The blinds may be made up to 2 extra slats on the bottom to ensure full coverage of the window.

The number of ladders or tapes shown in the images are for illustration purposes only. The width of blind ordered will determine how many tapes are a part of the blind.

Blinds with 3 or more ladders will have a centre support bracket, with up to 3 support brackets at maximum width.

Support brackets have a base with a width of 56mm X45mm depth
