

TWIST&FIT DAY & NIGHT

SPECIFICATION

Day and Night Blinds operate using a dual-layer system, where fabrics alternate in horizontal strips or sections. By adjusting the position of the layers, you can control the level of light and privacy to suit your needs.

With our Twist&Fit installation, you can fit Day and Night Blinds without drilling. Unlike traditional blinds, which require holes in the window frame or wall, Twist&Fit blinds use tension to stay securely in place. These blinds feature a white “open” cassette, and the Twist end caps are colour-coordinated for a polished look.

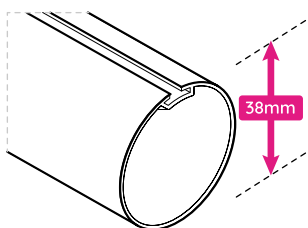

Day and Night Blinds are designed to finish in the ‘night position’ (no transparent strips visible) when fully rolled down. However, please note that we cannot guarantee the alignment of the strips across blinds with different drop lengths.

All our blinds comply with child safety regulations, with control cords and chains limited to a maximum length of 1 metre. If you have specific requirements, please get in touch with us.

Each blind is cut to size with working tolerances of +/-5mm for precise fitting.

Fabric is approx. -58mm overall compared to the end-to-end size (finished blind size).

COMPONENTS

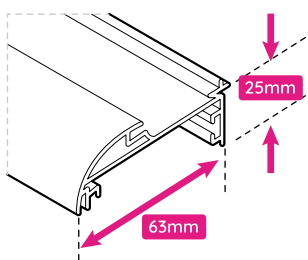

Twist&Fit Plunge End with Cog

The Twist&Fit Plunge End with Cog is fitted on the opposite end of the sidewinder control.

This mechanism fits securely within the end caps/covers on each end, which act as braces between the blind and the wall.

The Roller Tube used has an internal diameter of 38mm.

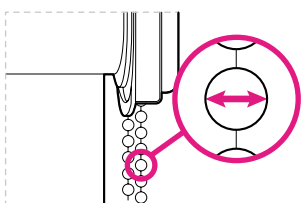

Open Cassette Headrail

The Headrail is made from sturdy metal and powder-coated in white.

The Headrail End Covers have a matte finish and feature a special Twist&Fit grip on the wall side to ensure a secure fit.

Headrail Dimensions: 63mm Depth x 25mm Height

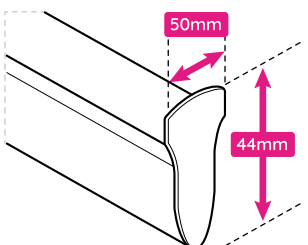

Twist&Fit Cover Dimensions: 75mm Depth x 84mm Height, 4mm Thick

Control Chain

The Control Chain comes with a rust-resistant chrome finish.

4.5mm diameter ball chain.

Bottom Bar

The bottom of the blind is fed through a trapezoid-shaped Bottom Bar.

Colour-coordinated End Caps are fitted.

End Cap Dimensions: 20mm Depth x 43mm Height
